

Geography Learning Journey

YEAR 11

How does urban change in London, UK lead to a variety of social, economic and environmental opportunities and challenges?

FIELDWORK: To what extent does housing quality improve the further from the CBD of.....

How does a lack of energy lead to insecurity and conflict?

How can the UK achieve urban sustainability?
What are the different strategies to increase energy supply?

Why is demand for energy resources rising globally?

How can coasts be managed?

How is the coasts shaped by physical processes?

What are the changing demand and provision of resources in the UK and how these create opportunities and challenges.

Why is food, water and energy fundamental to human development?

What erosional and depositional landforms are created at coasts?

How does deforestation in the Amazon have economic and environmental impacts

How can we reduce our resource use?

Where in the world suffers with water stress?

What's the problem with using bottled water?

What are the factors that affect food supply?

What are the pros and cons of renewable verses non-renewable energy?

How does urbanisation affect the water cycle?

Why is global energy distribution unequal?

Where should we source our food? Global verses local?

Do you know the darker side of chocolate production?

Can you design your own country?

Understanding the Demographic Transition Model

How do top down strategies close the development gap?

Are TNC's really advancing Asia?

What is the physical geography of Asia?

What are the Impacts and Responses of volcanoes in LICs

Does wealth affect the severity of impacts?

7.7 billion people and counting. Who's theory will be correct, Malthus or Boserup?

What are the consequence of uneven development?

What factors cause development

What is the true impact of tourism.

Can population be controlled?

Is prediction, planning or protection the best method to manage tectonic hazards?

What are the Impacts and responses of volcanoes in LICs?

What are the Impacts and Responses of earthquakes in LICs

How does plate tectonics move the earth?

How can we measure development?

Can we measure happiness?

What are the coastal process that work to shape the coastline?

How can coasts be managed?

What is the link between geography and sport?

How has industry changed over time?

Why do TNC's locate processes in different countries?

Does fair trade close the development gap?

What is the structure of the earth?

Where do all the billionaires live?

How do we close the development gap?

Can you locate our Yorkshire coast and why is it valuable?

How are stacks and spits formed?

How can holistic management be used on the Jurassic coast?

How do football stadiums creates positives and negatives?

Why do companies still use child labor?

How can businesses be sustainable?

Can technology make impossible places, possible?

What makes a place forbidden? Is Las Vegas future proof?

What influences microclimates?

Name the landforms created by glaciers

Where are glaciers located?

How is geological time broken down?

How can you survive a hurricane?

How is technology use to manage hurricanes?

What are the Impacts of hurricanes in LICs

How are hurricanes formed?

Why did Dubai build the current world's tallest building?

Is Dubai sustainable?

What makes a place impossible?

How can global warming be managed?

How is global warming different to climate change?

What are the erosion and transport glacial processes

What is climate?

What causes the UK extreme weather?

What are the response to hurricanes?

How are the strength of hurricanes measured?

How are major hazards formed?

Causes and impacts of deforestation.

What can be done to sustainably protect tropical rainforests?

Cause of conflict in the TRF.

How does urbanisation happen? Push and pull factors.

Why is Kenya important?

The journey of a river. What are the erosional and depositional processes?

What are the causes of flooding? Human and Physical.

What are the Impacts of flooding in LIC's and NEEs

How can rivers be managed?

How are the plants and animals of the TRF adapted?

Why climate and biomes dominate Africa?

What resources does Africa have?

What are squatter settlements and how can they be improved?

Why is the water cycle important?

How are waterfall's formed?

What are the impacts of flooding in LICs?

What are the impacts of flooding in LICs?

Why is Brazil important?

To drill or not to drill oil at the Arctic?

How are animals adapted in the Arctic?

What is the climate like at the Poles?

How can we model land use?

What is settlement hierarchy

What's the problem - plastics, climate change, deforestation?

What is geography?

Where is the tropical rainforest and other major biomes in the world?

Can international agreements protect cold environments?

Who were the great explorers to the polar environments

Why is living in the Arctic a challenge?

What are the different settlement patterns

What factors make a good settlement site?

Our UK

What is the difference between Human and Physical geography?

welcome

' Geography is the subject which holds the key to our future. ' MICHAEL PALIN
